

KRONES.SHOP ACCESS REQUEST

Kosme TOP II AD - digital OEM documentation and eCat access

REQUESTED ACTION: Please register or authorize a company Krones.shop account for the maintenance employee working on this labeler, or add that employee as an individual user under the plant's existing Krones customer profile. If the plant already has access, please help associate this exact machine with the account. An individual authorized account is preferred over sharing another person's password.

Why this access is needed

We are documenting and troubleshooting a recurring production problem on the plant's Kosme labeler. The paper manual is being photographed page by page. Authorized Krones.shop/eCat access would let maintenance obtain the original digital manuals, drawings, parts information and machine-specific records accurately and efficiently, then preserve them in the plant's Industrial Asset Graph and maintenance system. This supports faster diagnostics, better preventive maintenance, controlled spare-parts identification and reduced dependence on repeated service-call band-aids.

Machine information for account association

Installed machine	TOP II AD TANDEM 20/1056 CE SA4 E2
Registration number	L05358
Manual/order code	K966-749
Rated output	18,000 pieces/hour
Electrical	400 V, 3-phase N-PE, 60 Hz; 24 V AC auxiliary; 6.5 kW
Pneumatic	15 NI/min at 6-7 bar

What Krones.shop can provide

- A profile tailored to the plant's machinery and linked to Krones eCat.
- Personal machine documentation and access to loaded machines.
- Machine-specific parts lists, images and connection diagrams.
- Parts availability, pricing, quotes, orders and upgrade information.
- Documents and videos available through the authorized account.

Registration information needed

- Plant company and billing/shipping address.
- Krones customer number, if known.
- Authorized user's company email and phone number.
- User name, division and preferred language.
- Confirmation that the plant is a commercial Krones customer.

Digital files requested after access is established

Complete operating and maintenance manuals; electrical and pneumatic drawings; mechanical assemblies; spare/wear-parts catalogs; labeling-unit documentation; CR27 synchronizer and KET39 electronic-cam documentation; maintenance and lubrication plans; software/parameter backups where authorized; service bulletins; revisions; and any machine-specific Krones/Kosme files associated with L05358 or K966-749.
