

LINE 2 HOT FILLER — RAW PRODUCT FLOW TO HOLD TUBE

OBSERVED HMI SNAPSHOT VALUES
(Not Design Values)

LEGEND

- Process path / forward flow
- Instrument signal / electrical / pneumatic
- PT Pressure Transmitter
- TT Temperature Transmitter
- RTD Resistance Temperature Detector

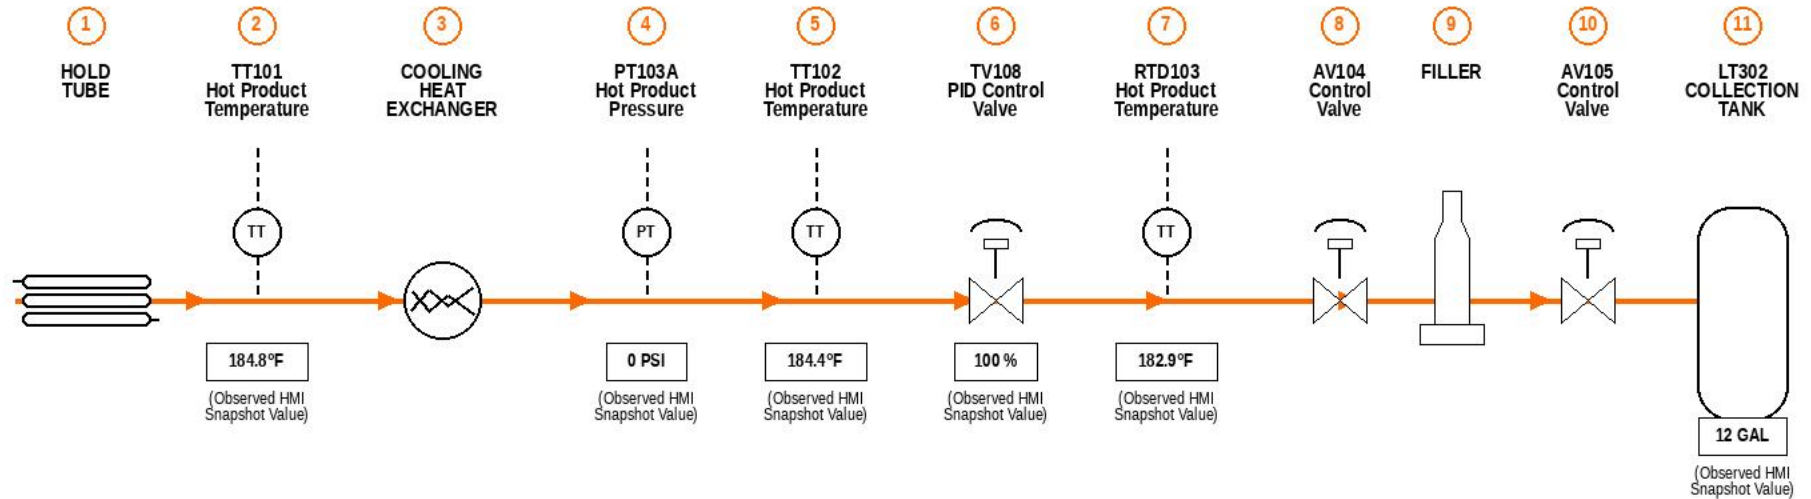

NOTES

- This diagram shows only the raw product supply / forward path up to the hold tube.
- RAW-PRODUCT FILTER / MANIFOLD INTERNAL RELATIONSHIPS TO BE VERIFIED AGAINST HMI / FIELD PIPING. TOPOLOGY FIELD VERIFY.
- Return, filler, collection tank, return cooler, steam, condensate, and cooling-water circuits are intentionally omitted.
- CORRECTED FROM DOCUMENTED REVIEW NOTES. ITEMS MARKED FIELD VERIFY REQUIRE HMI OR PHYSICAL PIPING CONFIRMATION.

REV	0	DATE	05/13/2025
DESCRIPTION	ISSUED FOR REVIEW		
DRAWN BY	PROCESS ENGINEERING	SHEET	1 OF 3

LINE 2 HOT FILLER — HOLD TUBE TO LT302 COLLECTION TANK

OBSERVED HMI SNAPSHOT VALUES
(Not Design Values)

LEGEND

— Process path / forward flow

--- Instrument signal / electrical / pneumatic

PT

Pressure Transmitter

TT

Temperature Transmitter

RTD

Resistance Temperature Detector

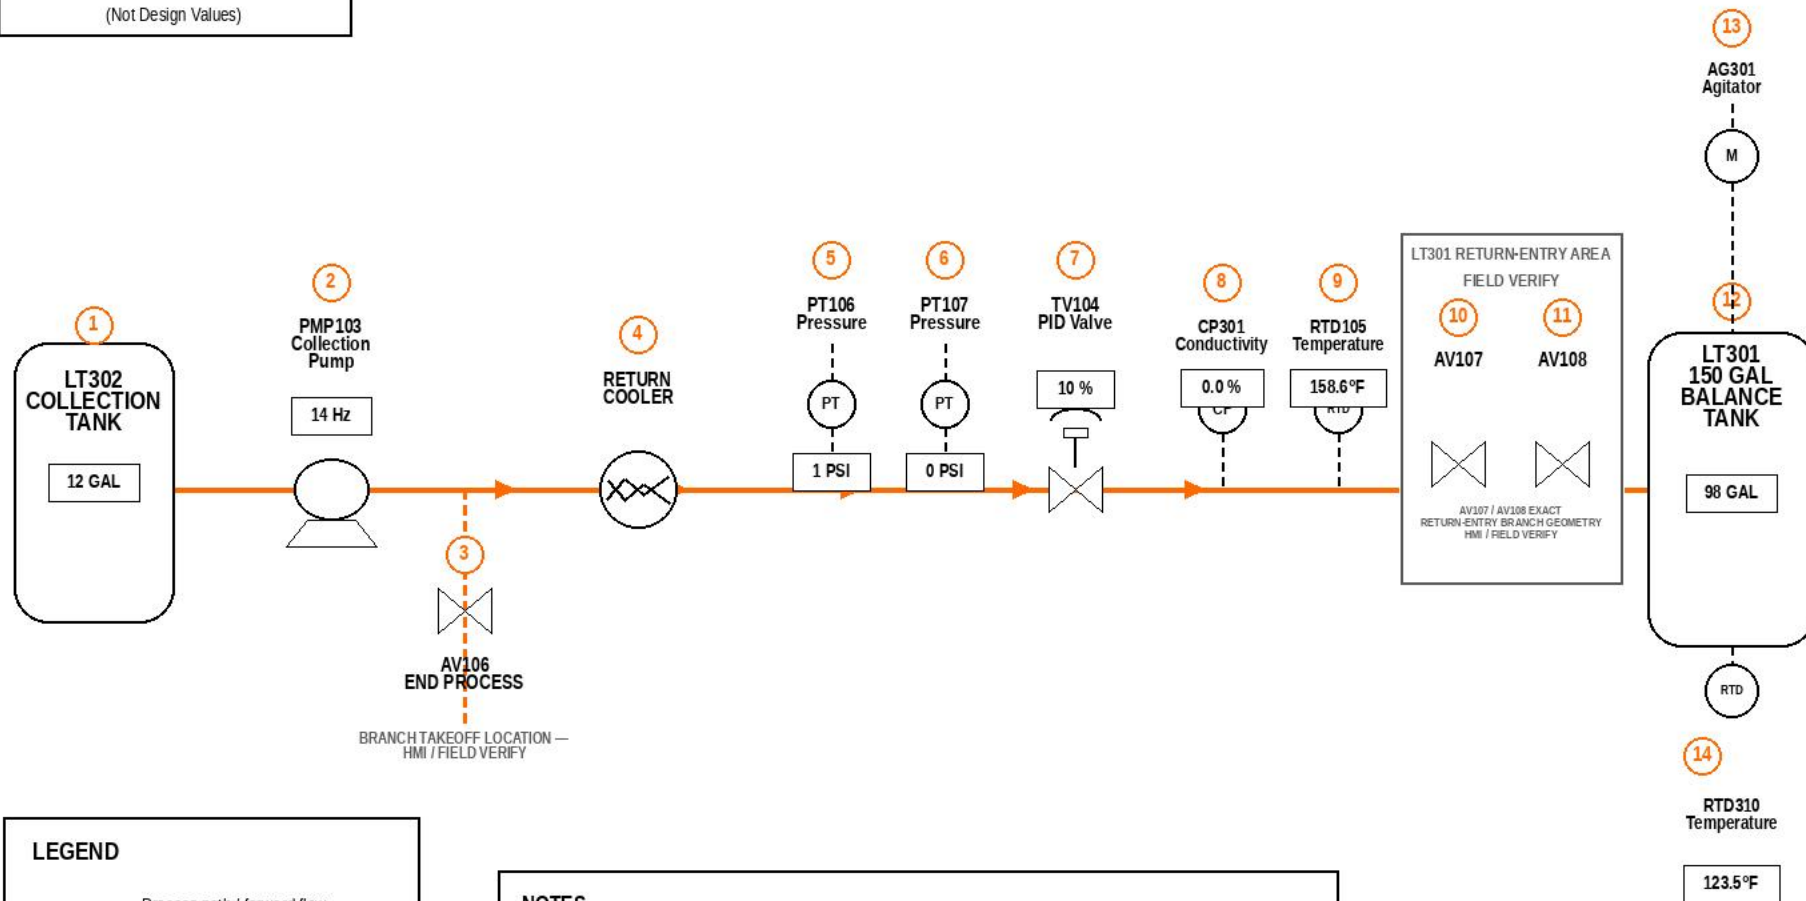

NOTES

- Main sequence preserved: HOLD TUBE -> TT101 -> COOLING HEAT EXCHANGER -> PT103A -> TT102 -> TV108 -> RTD103 -> AV104 -> FILLER -> AV105 -> LT302 COLLECTION TANK.
- No bottom return loop back to the cooling exchanger is shown.
- COLLECTION RETURN CONTINUES ON SHEET 3.
- CORRECTED FROM DOCUMENTED REVIEW NOTES. ITEMS MARKED FIELD VERIFY REQUIRE HMI OR PHYSICAL PIPING CONFIRMATION.

DESCRIPTION	ISSUED FOR REVIEW		
DRAWN BY	PROCESS ENGINEERING	SHEET	2 OF 3

LINE 2 HOT FILLER — COLLECTION TANK TO BALANCE TANK

OBSERVED HMI SNAPSHOT VALUES
(Not Design Values)

LEGEND

- Process path / forward flow
- Instrument signal / electrical / pneumatic
- PT: Pressure Transmitter
- TT: Temperature Transmitter
- RTD: Resistance Temperature Detector

NOTES

- Known return sequence preserved: LT302 -> PMP103 -> RETURN COOLER -> PT106 -> PT107 -> TV104 -> CP301 -> RTD105.
- AV106 is a separate END PROCESS branch. BRANCH TAKEOFF LOCATION — HMI / FIELD VERIFY.
- AV107 / AV108 exact return-entry branch geometry — HMI / FIELD VERIFY. No definitive straight-series relationship is asserted.
- CORRECTED FROM DOCUMENTED REVIEW NOTES. ITEMS MARKED FIELD VERIFY REQUIRE HMI OR PHYSICAL PIPING CONFIRMATION.
